

Cyclerion to Host Corporate Overview Call on May 13, 2019

April 25, 2019

CAMBRIDGE, Mass., April 25, 2019 (GLOBE NEWSWIRE) -- Cyclerion Therapeutics, Inc. (Nasdaq: CYCN), a clinical-stage biopharmaceutical company focused on the development of soluble guanylate cyclase (sGC) stimulators for the treatment of serious and orphan diseases, today announced that it will host a conference call and live audio webcast on Monday, May 13, 2019 at 8:30 a.m. Eastern Time. For its first webcast conference call as a public company, Cyclerion intends to provide a general corporate overview and discuss its clinical and preclinical development pipeline.

To access the conference call, please dial (800) 360-8162 (U.S. and Canada) or (409) 937-8760 (international) and reference the conference ID number 1979155. To join the live webcast, please visit the "Investors and Media" section of the Cyclerion website at www.cyclerion.com at least 15 minutes prior to the start of the call.

The call will be available for replay via telephone starting May 13, 2019 at approximately 11:30 a.m. Eastern Time, running through 11:30 a.m. Eastern Time on May 20, 2019. To listen to the replay, dial (855) 859-2056 (U.S. and Canada) or (404) 537-3406 (international) and reference the conference ID number 1979155. A webcast replay will be available on the Cyclerion website beginning approximately two hours after the event and will be archived for 21 days.

About Cyclerion Therapeutics

Cyclerion Therapeutics is a clinical-stage biopharmaceutical company harnessing the power of soluble guanylate cyclase (sGC) pharmacology to discover, develop and commercialize breakthrough treatments for serious and orphan diseases. Cyclerion is advancing its portfolio of five differentiated sGC stimulator programs with distinct pharmacologic and biodistribution properties that are uniquely designed to target tissues of greatest relevance to the diseases they are intended to treat. These programs include olinciguat in Phase 2 development for sickle cell disease, praliguat in Phase 2 trials for heart failure with preserved ejection fraction (HFpEF) and for diabetic nephropathy, IW-6463 in Phase 1 development for serious and orphan central nervous system diseases, and two late-stage discovery programs targeting serious liver and lung diseases, respectively.
